Topic: CE Stamp

The components that UFS Corporation supplies to fulfill orders are not required to carry the "CE Stamp". Following the guidelines set by the European Commission, these components are considered "components without any direct function". When the components without any direct function are installed in the "apparatus" which has a direct function, the functional "apparatus" must be marked with a "CE Stamp". Responsibility for applying the stamp is with the apparatus designer and/or manufacturer.

Components manufactured and supplied by UFS Corporation that come into contact with the paint materials are silicone free and approved by major United States electrocoat paint manufacturers.

The TECTRON™ Anode Cell is manufactured by UFS Corporation in accordance with internal proprietary specifications under one or more of the following United States patents: 4,711,709; 4,834,861; 4,851,102, and 5,213,671. Other patents are pending.

For more information contact your UFS Sc Sales & Service Engineer at the phone number shown above.
